RE: **Air Monitoring Data
Period From September 27 Through October 1, 2010
O'Hare Modernization Program - Southwest Acquisition Area**

This memorandum summarizes the air monitoring data collected during demolition-related activities conducted at the O'Hare Modernization Program (OMP) Southwest Acquisition Area during the period from September 27, 2010 through October 1, 2010. Demolition activities occurred in Area 3 during this period. Packages 2, 3, 4 were monitored as one contiguous area.

Two DustTrak Aerosol Monitors (Monitors) were established within each contiguous demolition area for each day of demolition-related activity. One Monitor was placed at a perimeter upwind location, and a second Monitor was placed at a perimeter downwind location within active demolition areas. The Monitors were programmed to collect and record readings of particulate matter with diameters of ten micrometers or less (PM₁₀) at hourly intervals throughout the day, and provide an average reading for the complete run time based on the hourly readings. Monitors operated and recorded readings for the duration of the workday (no more than twelve hours per day). To assess the potential particulate contribution from demolition activities, the average daily upwind reading was subtracted from the average daily downwind reading to provide the net PM₁₀ concentration. The attached Table 1 provides a summary of the collected air monitoring data from the period noted above.

The air monitoring results for Demolition Areas 2, 3, and 4 indicate that the net contribution of PM₁₀ concentration to the ambient air were below the Screening Level of 0.3 milligrams per cubic meter.

TABLE 1

AIR MONITORING DATA
 SEPTEMBER 27 THROUGH OCTOBER 1, 2010
 O'HARE MODERNIZATION PROGRAM

<i>Date</i>	<i>Average Downwind Reading (mg/m³)¹</i>	<i>Average Upwind Reading (mg/m³)</i>	<i>Net Difference (mg/m³)</i>
<i>Demolition Packages 2, 3 and 4</i>			
9/27/2010	0.023	0.030	-0.007
9/28/2010	0.036	0.019	0.016
9/29/2010	0.025	0.020	0.005
9/30/2010	0.031	0.061	-0.030
10/1/2010	0.020	0.008	0.012

Note: Instantaneous readings collected at 1-hour intervals for the duration of the work day (≤ 12 hours). Daily average is the average of the hourly readings.

¹ mg/m³ - milligrams per cubic meter
