

THE VILLAGE PLAN REQUIRES:

- The White Pines water system to be replaced to ensure safe, reliable, and high quality water to White Pines.
 - Replacement of the water system includes installing new 8 and 12 inch water mains within the public right-of-way.
 - The project costs approximately \$7 million which includes the installation of new service lines to the affected homes.

PLAN DETAILS

The Village of Bensenville has developed a plan to address this issue:

- The Village will run the water main replacement project as a Village project.
- This includes:
 - The Village will pay for the water service lines wherever needed.
 - The project scope also includes repairs to the landscaping / private properties for any damages due to construction.

NEXT STEPS:

- Tonight, the Village will be handing out individual information with personalized costs for each residence in the project area.
- The White Pines residents are encouraged to review the information and meet with Village staff in the coming weeks to discuss questions and concerns.
- The Village will provide voluntary annexation agreements to residents.
- The Village intends to apply for the IEPA loan in the fall of 2018 to secure the funds to carry out the water main replacement project.
- The project will begin once the IEPA loan have been approved.
