INFORMATION LETTER NO. 1

2019 ANNUAL SANITARY SEWER CURED IN PLACE PIPE (CIPP) PROJECT

Dear Project Area Residents, Institutions and Interested Parties:

The Village of Bensenville is undertaking a sanitary sewer CIPP project in the vicinity of your home in the Spring/Summer 2019. This is commonly known as sewer lining. The project consists of sewer lining of approximately 7,000 linear feet of sanitary sewer. The areas being improved by this project are highlighted in yellow color in the map below. An innovative process called "*Sewer lining*" will be utilized to reconstruct certain sections of badly deteriorated sewer. This reconstruction will be done without time consuming, expensive and disruptive excavation. Instead of digging up and replacing the old pipeline, the *Sewer lining* process provides for the insertion of a special lining inside the pipe, creating a new smooth-surfaced, long-lasting pipe within the old sewer.

The Village jointly went to bid with on the project with other municipalities on this project. Other communities participating in this program are Village of Lombard, City of Elmhurst and Village of Carol Stream. Hoerr Construction of Goodfield, IL was the low apparent responsible bidder on this project. Hoerr comes with many years of experience in utility installation of this magnitude. Hoerr will utilize its own crews to complete the cleaning and televising on the project. The contract was awarded to Hoerr on March 26, 2019 Village Board meeting.

At this time, weather permitting, the tentative start date for the project is set for the week of April 15, 2019. The contractor will begin with cleaning and televising the existing condition of the sewer. This will take up to a week or two to complete. Once the televising videos have been accurately reviewed, we anticipate Hoerr will begin the installation of the liner during the latter half of week of April 22, 2019. There is approximately 7,000 lineal feet of sanitary sewer to be lined and 142 individual services to be re-instated as part of project. The completion date for this project is June 30, 2019.

One of the goals of this letter is to prepare you for what to expect as part of the project. There will be a direct impact to those residents who reside on these streets; however, the surrounding area will be impacted with the construction noise and traffic. We are hopeful of receiving a full cooperation from the residents during this project.

Village of Bensenville

2019 Sanitary Sewer CIPP

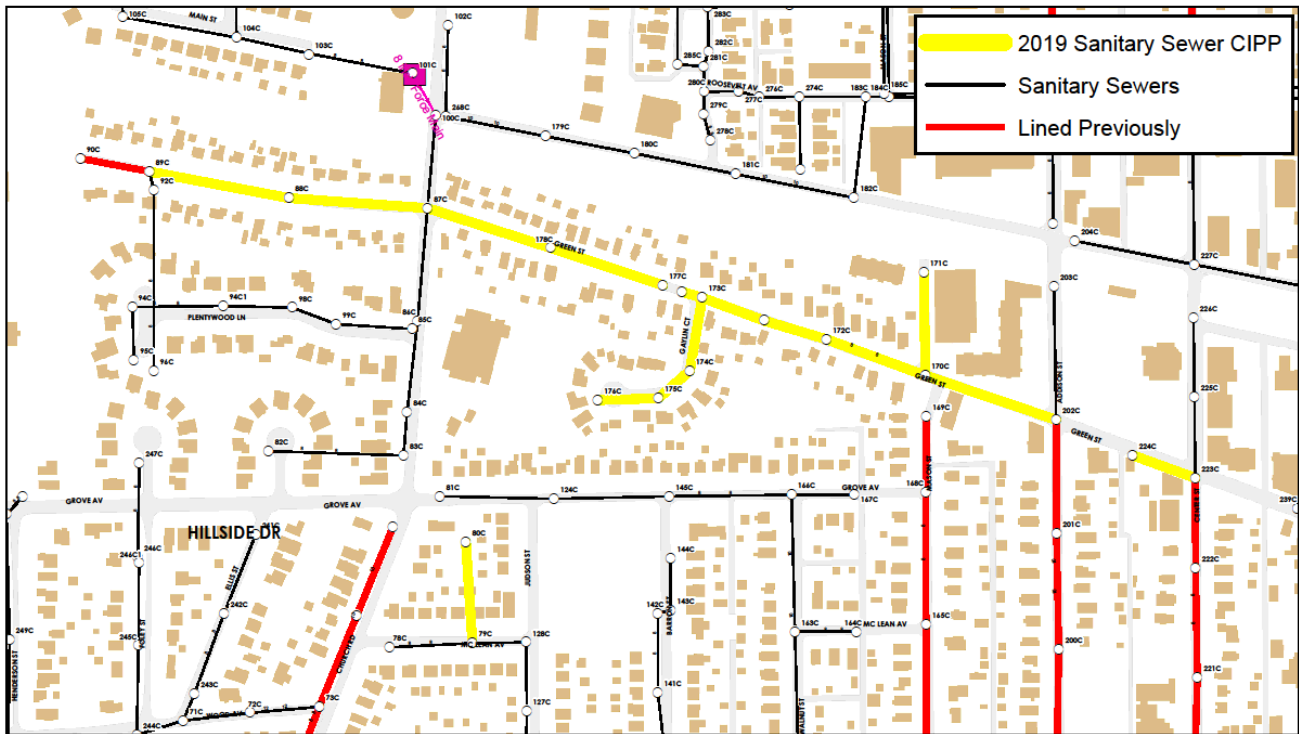

Date: 2/28/2019

Village of Bensenville

2019 Sanitary Sewer CIPP Preliminary

Date: 2/27/2019

Daily Work Hours – Daily work hours are from 7:00AM to 7:00PM, Monday thru Friday. At this time we do not anticipate any Saturday work, but will adjust based on progress. No work is permitted on Sundays and holidays. Should the contractor start early, please feel free to call the police department.

Utility Markings – As part of the construction process, the contractor frequently calls J.U.L.I.E. to help assist in the locating of buried utilities. We ask for your cooperation in maintaining the marks and flags, as they are located. We realize this can be a burden during mowing of the parkways. If it is necessary to remove the flags, please replace them in their exact location. Your cooperation will help avoid unnecessary utility outages.

Information Transfer – Information letters, like the one you are reading now, will be posted on the Village website to keep all residents along the project corridor abreast of the current progress and activity of the project. In addition, daily notifications will be delivered (in the form of door hangers) to each resident that will likely be directly affected by the upcoming days' work schedule. Once the project begins, please make a habit of checking your front door for these notifications.

Parking / Access to Driveways – is not anticipated to be impacted by the project.

Garbage Pickup – is not anticipated to be impacted by the project.

Curbside Branch/Brush Pickup – The Village will be conducting a curbside branch/brush pickup during week of April 1, May 6, June 3, July 1, Aug 5, Sept 3, Oct 7, and Nov 4. **Residents in the project area must place their branch/brush curbside by 7:00 AM on these dates.** The Village will begin their efforts in the construction corridor in attempt to keep the corridor clear for the contractor.

Traffic Control – During working hours, traffic may be hindered in the direct vicinity of the work. We will attempt to maintain traffic flow throughout each day. The principal intent of traffic control signage is to limit use of the streets in areas under construction to local traffic only. The signs are posted for the safety of the construction crews, pedestrians, drivers, and residents. Please obey all construction signage and respect barricades and warning devices. Roadway closures aren't anticipated at this time; however, if possible, it would be in your best interest to avoid the construction zone. Detours may be posted, if necessary.

Safety Concerns - It is worth a reminder to say that any construction site is a dangerous situation, perhaps even more so during the hours the contractor is not actually working the area. Please remind yourselves and your children of the dangers inherent in the construction zone that are present at all times. I appreciate your help in trying to maintain as safe a project site as possible. Should there be a condition that is particularly hazardous, please feel free to contact me.

A friendly tip during this process: Take a minute to pour a cup or two of water into each basement floor drain. It keeps the "trap" full which prevents sewer odor from coming into your home. Because the water evaporates, this should be done regularly. It is also a good idea to keep your toilet lids down for the date and time in question

In closing, thank you again for your interest, patience and cooperation as we move through the construction stage of the project. Inevitably there will be disruptions and inconveniences to endure in the coming months. Please contact public works, Mehul or myself with any concerns, insights and suggestions. The Village and the contractor are all committed to keeping the lines of communication open and to have a successful and safe project.
